# RIB | Candy Cloud

## Scalable Desktop-as-a-Service Solution

# CANDY CLOUD SOLUTION

**Candy Cloud Solution is an online, highly customisable, fully managed, secure "Desktop-as-a-Service" Solution.**

The solution allows for Candy (Single & Multi-User) and QTO to be deployed online and accessed from any location around the world.

Available in Microsoft Azure & Amazon AWS.

The High-level architecture satisfies the following critical requirements:

| Data security and protection | Scalable, grows with your organisation | No special hardware required | Centralised databases | Multi-platform accessibility |
|---|---|---|---|---|

## CANDY BENEFITS

- Dedicated environment for your organisation
- Multi-User from any location around the globe
- All company project data in one online, centralised database
- Data security, only your organisation has access to your data
- You are in control of your passwords

- Fully Managed Hosted Solution by RIB Software
- Allows 2D Take-off
- Run Candy & QTO on your iPad or Android Tablet
- Allows Candy to run on Mac computers

## CANDY CLOUD SOLUTION – ARCHITECTURE

Dedicated environment that can be scaled according to your specific needs.
